

User Manual

This manual describes the core features and usage of the Library Management System. The system consists of two distinct interfaces: **The User Portal** (for clients) and **The Admin Dashboard** (for staff).

1. User Portal

The user application allows library members to explore the catalog, manage their favorite books, and track their reading journey.

Main Navigation

- **Home Page** `/` : Highlights recent books, recommendations, and offers a search bar to find specific titles.
- **All Books** `/AllBooks` : Displays the complete library catalog.
- **Categories** `/Categories` : Allows filtering books by genres (Fiction, Science, History, etc.).

Personal Space

- **Authentication** `/auth` : Allows users to log into their account or register. Google Authentication is also supported.
- **My Favorites** `/Favorites` : Users can add books to their favorites list to easily find them later.
- **My Reading Journey** `/MyReadingJourney` : Allows users to track the history of books they have borrowed or are currently reading.

2. Admin Dashboard

The admin interface is a powerful tool for library staff, enabling full management of daily operations.

Admin Login

Upon opening the admin panel, a login screen requires administrator credentials. Once logged in, you can access the sidebar menu to navigate between different sections.

Sections Overview

Dashboard

An overview of library activity. It displays key metrics such as:

- Total number of books.
- Total registered users.
- Active borrowings.

Books (Catalog Management)

The interface for managing the library catalog:

- View the complete list of books.
- Add new books to the system (title, author, category, stock).
- Edit the details of an existing book.
- Delete a book.

Borrowings

The core of library management:

- Create a new borrowing record when a member borrows a book.
- Track active borrowings (who borrowed which book, and when).
- Mark a book as returned, which automatically updates the stock.

Users

Member management:

- Display the list of all registered users (Name, Email, Phone).
- Check user status (Active or Suspended).
- Manage suspensions in case of library policy violations.

Fines

Penalty tracking:

- Manage overdue borrowings.
- View unpaid fines associated with each user.

Practical Tips

- **Security:** Never share your administrator credentials.
- **Updates:** Ensure the application is always connected to the API server (which must be running in the background) so that the data stays up to date.
- **Log out:** Remember to log out of your admin session on shared computers.
